## NEW PRODUCT ANNOUNCEMENT

Dear CTI Customer,

CTI is pleased to announce the upcoming release of the 2572-B Fast Ethernet Adapter for 2500 Series® Classic I/O. Upon release, the 2572-B will replace the 2572-A. We will continue to provide support and repairs for the 2572-A, but it will no longer be manufactured and availability is limited to remaining stock.

The 2572-B continues the proud legacy of the 2572 and 2572-A with the addition of a new front-panel IP address display and elimination of the serial configuration port. All configuration is now done over Ethernet using a standard web browser.

Features of the 2572-B include:

- Direct replacement for the 2572-A
- New IP address display on front panel
- No serial connection required to set IP address
- DHCP address switches removed from front panel (contact CTI if your application uses DHCP)
- Provides a substantial increase in transaction processing capability compared to 2572
- Supports 10Mb and 100Mb Ethernet
- Does not require special configuration software and cables
- Offers enhanced browser-based diagnostic facilities to help in troubleshooting
- Incorporates flash memory technology to facilitate firmware upgrades in the field using a web browser
- Compatible with 2572 and 505-CP2572 PLC logic interface
- Fully compatible with 2572-DDS2 and 2572-OPC I/O servers

For more information about 2500 Series® products, visit our website:
