Description

The 2534 8-Point Form C Relay Output Module provides eight isolated Form C relay outputs for the CTI 2500 Series® or the SIMATIC® 505 I/O base. This module plugs directly into the CTI 2500 Series® I/O base and responds to CTI 2500 Series® instructions. The 2534 is designed for high current applications such as switching motor starters. It is also designed for 125 VDC (nominal) low level current applications and is especially suited for applications in power utility substations.
