2560-A 8-Channel Isolated Analog Output Module

Description

The 2560-A is a high-speed 8-channel isolated analog output module designed to be compatible with the CTI 2500 Series and Simatic® 505 I/O base. The 2560-A translates a digital word from the controller into equivalent analog outputs.

Features

- 1500V channel-to-channelisolation
- 1500V channel-to-PLC backplane isolation
- Fast 0.25 mSec update time per channel
- Voltage and current outputs available simultaneously
- Bipolar or Unipolar outputs per channel
- Individual D/A converter for each output channel

Note: This module requires Wiring Connector. Model #2500-40F.

NOTE: The front connector on the module contains a G terminal which may be used for the shield wire if the installation is in a noise free environment. If the installation is in an extremely noisy environment CTI strongly recommends that the shield wires be terminated to the PLC chassis ground.
