

2588-8 8-Point Universal Input Module

Description

The 2588-8 8-Point Universal Discrete Input Module accepts a wide range of voltage signals. It is designed to accept both AC and DC voltage allowing the user to pick and choose ranges on a single module. The 2588-8 can replace Siemens® 8 point input products with no rewiring. Motor centers, optical sensors, limit switches and utility control are excellent examples of applications for this product.

Isolation Configuration

On the 2588-8, two channels share a common return path. On the 2588-8 J3 through J6 are not used.

Voltage Range

The 2588-8 will handle a wide range of AC and DC signals, and has jumpers located on the PCB to allow the user to select between 12/24V, 48V, 110V or 220V on a per channel basis using the jumpers located on the PCB. See the PCB Jumper Configuration Location diagram below. The operating ranges are as follows:

Range Setting	Operating Range
12/24V	11 - 30 Volts
48V	40 - 56 Volts
110V	79 - 132 Volts
220V	164 - 265 Volts
